Project Proposal

Pharmacy Management System – Desktop Software

Prepared by: Faiz Hashmi – Senior Software Engineer
Date: 17 October 2026 | Quotation valid for 30 days

1. Introduction

This proposal covers simple, easy-to-use software for your pharmacy, along the lines of the D Watson system you mentioned.It runs on a normal Windows computer and **works without internet**. As requested, it is quoted as two options, and each extra feature is priced separately so you only pay for what you need.

2. Option 1 – Purchasing & Stock Management

For buying medicines from companies and suppliers, and keeping track of the stock in the pharmacy.

What's included:

- Keep records of medicine companies and suppliers.
- Record every purchase: supplier, invoice number, date, quantity and purchase price.
- Enter stock with **batch number** and **expiry date**.
- Search any medicine by name or by formula (salt) to see how much stock is left, and in which batches.
- View all past purchases and batch details.
- **Expiry and low-stock warnings:** the medicine is highlighted and **flashes in red**, and a **sound alarm** plays (it can be muted). Sound alarm is included.
- You set the warning period (for example, ***6 months before expiry***) and the minimum stock level for each medicine.

How stock goes down without a sales module:

A simple **"Stock Out"** screen is included. Whenever medicine is used, given out, damaged, expired or missing, you enter the quantity and the reason, and the stock is reduced. You can also do a stock count from time to time, and the software corrects any difference.

Option 1	Price	Delivery time
Purchasing & Stock Management	USD 2,000	6 weeks

3. Option 2 – Purchasing plus Sales & Billing

Everything in Option 1, plus:

What's included:

- Sell medicines to walk-in customers from a simple sales screen.
- Pick the medicine and quantity, and the bill total is calculated automatically.
- Sold medicine is **automatically deducted from stock**, from the batch that expires first.
- Print the bill on a small receipt printer or a normal A4 printer, and save and reprint any old bill.
- View sales history and the **total sales for each day**.

Option 2	Price	Delivery time
Extra cost to add Sales & Billing	USD 1,200	+3 weeks
Option 2 total (Option 1 + Sales & Billing)	**USD 3,200**	**9 weeks**

Prescription entry and printing is **not included** in either option. It is priced separately below.

4. Milestones & Payment Plan

The work is delivered in parts. After each part, you see and test it, and the payment for that part is made after you approve it.

Option 1 – USD 2,000

Milestone	When	What you get	Payment
Advance	On signing	Project start	USD 300
Milestone 1	Weeks 1–2	Medicine list, companies & suppliers	USD 500
Milestone 2	Weeks 3–4	Purchases, batches & stock view	USD 600
Milestone 3	Weeks 5–6	Stock Out, expiry & low-stock alarms, installation & training	USD 600
Total	**6 weeks**		**USD 2,000**

Option 2 – USD 3,200

Milestone	When	What you get	Payment
Advance	On signing	Project start	USD 480
Milestone 1	Weeks 1–2	Medicine list, companies & suppliers	USD 500
Milestone 2	Weeks 3–4	Purchases, batches & stock view	USD 600
Milestone 3	Week 5	Stock Out, expiry & low-stock alarms	USD 450
Milestone 4	Weeks 6–7	Sales screen & automatic stock deduction	USD 700
Milestone 5	Weeks 8–9	Bill printing, sales history, installation & training	USD 470
Total	**9 weeks**		**USD 3,200**

If the project is cancelled after it starts, the advance is kept for the work already done. Any feature not listed in this proposal will be quoted separately before work starts.

5. Optional Add-ons

These are optional. Each one can be added now or later. If you might want **multiple computers, multiple branches, remote access or box/strip/tablet selling**, please tell us before work starts, because adding these later costs more.

Add-on	What it includes	Extra cost	Needs Option 2?
Supplier accounts	Payments, outstanding balances and supplier statements	USD 350	No
Returns & stock corrections	Returns to suppliers and from customers. (Damaged/missing stock is already included in Option 1.)	USD 300	Only for customer returns
Barcode scanning	Scan medicine barcodes when adding stock and selling	USD 200	No
Barcode label printing	Create and print labels for medicines	USD 250	No
Pack & unit selling	Boxes, strips and single tablets, with stock adjusted correctly	USD 400	Only for selling loose
User accounts	Separate staff logins, what each person can do, and a record of changes	USD 350	No
Backup & restore	Automatic daily backup to a USB/second drive, and easy restore	USD 200	No
Reports & exports	Profit, stock value, purchase and sales reports; export to Excel or PDF	USD 450	Only for sales & profit
Import existing records	Upload your current medicine and stock list from Excel	USD 200	No
Customer accounts	Customer records, credit sales and outstanding balances	USD 350	Yes
Discounts & taxes	Discounts and tax on bills	USD 250	Yes
Prescription printing	Enter and print a doctor's prescription	USD 300	No
Multiple computers	Two or more computers in the pharmacy sharing the same records	USD 700	No
Multiple branches	Separate stock for each branch, and transfers between branches	USD 1,200	No (needs Remote access)
Remote / cloud access	See your stock and sales from home or phone browser	USD 1,400	No
Other: Reorder list	A ready list of medicines to order, based on low stock	USD 250	No
Other: FBR billing	Connect bills to FBR, if the pharmacy is required to do so	USD 600	Yes

6. Quotation Details

Item	Details
Currency	US Dollars (USD). Payment in PKR is possible at the exchange rate of the payment day.
One-time cost	Option 1: USD 2,000. Option 2: USD 3,200. Add-ons as listed above.
Monthly / yearly cost	None. There is no monthly fee for the software. (Remote access and Multiple branches need online hosting of about USD 10–25 per month.)
Computer needed	Windows 10 or 11 computer
Works offline?	Yes, completely. Internet is not needed.
Installation	Included: installed on your pharmacy computer
Printer setup	Included: receipt printer and A4 printer set up
Training	Included: one training session for you and your staff, plus a short user guide
Source code ownership	Yours after the final payment
Bug fixes	Free for 60 days after the software goes live
Support afterwards	Optional: USD 30 per month for help, fixes and small changes
Payment terms	15% advance, then payment after each approved milestone (Section 4)

Item	Details
Delivery time	Option 1: 6 weeks. Option 2: 9 weeks. Add-ons may add 1–3 weeks.

Extra costs not included (bought by the client)

Item	When needed	Approx. cost
Receipt printer (80 mm)	Option 2 bills	PKR 12,000 – 25,000
Barcode scanner	Barcode scanning add-on	PKR 4,000 – 12,000
Label printer	Label printing add-on	PKR 25,000 – 50,000
UPS (recommended)	Protects data during power cuts	PKR 15,000 – 40,000

No other software licences are needed.

7. What We Need From You

- Pharmacy name, address and logo for printed bills.
- Your current medicine list and a few supplier invoices (photos are fine).
- Confirm the expiry warning period (e.g. 6 months) and minimum stock levels.
- A Windows computer, and printers/scanner if those options are chosen.
- Test each milestone and give feedback within 3 working days.
